DOCKETED

RE: BEAVER DAM WATER COMPANY APPLICATION

JUN 29 2012

SUBJECT: BEAVER DAM PROPERTY OWNERS ASSOCIATION
BEAVER DAM WATER COMPANY RATE INCREASE

DOCKETED BY	JM
-------------	----

Beaver Dam is a small retirement community of approximately 184 lots that was severely damaged by the 2010 flood which destroyed sewer, roads, individual lots and homes. The Association is still waiting government answers regarding the above damages. The cost to repair "just the roads" most likely will be extensive to each individual lot/home owner which we will all bear those costs.

Most of our Association members reside in the park 6 months during the winter months. The economy has affected our members, some having to move out of the park as a result of higher living costs and the fear of increases to repair road damage, higher water costs, etc.

We feel that additional increase in our water costs, especially at this time, can and will have an adverse effect on all our members. We ask the Commission to veto the Beaver Dam Water Company proposed rate increase.
